

FOR IMMEDIATE RELEASE

Global Vision Technologies Launches Video Series for Child Welfare Software Form Development and Financial Billing Management

St. Louis, MO June 30, 2010 - Global Vision Technologies, the creators of FAMCare web-based child welfare and social services software for non-profits and county/state agencies announced today the release of "Under the Hood" – a live motion video series that walks visitors through FAMCare's built-in form development wizards and financial management tools.

Visions Server – GVT's proprietary Microsoft .Net engine is reviewed in detail. The videos cover the different aspects of the form development wizard such as – form creation, setting form security, workflow, and reports, among others. There are 6 form development wizard videos in all. Total time to watch all 6 – 15 minutes. You can view the [Visions Server form development videos](#) by visiting:

"In today's difficult economy - there is a need for agencies to be more self-sufficient and fiscally responsible. That's why we continue to improve upon the FAMCare platform with enhancements and productivity tools to help improve the bottom line for our friends in the child welfare and social services industries. Our goal is to create a web based case management solution that saves people money", said George Ritacco, Executive Director, Client Services at GVT.

About Global Vision Technologies

GVT is a provider of world-class information management solutions for child welfare and human services case management, patient registries, and e-learning management. The company strength is derived from its ability to rapidly deliver tailored, cost effective and proven web-based tools that save organizations time and money by improving time to ramp up, while reducing overall training and support costs.
