

# Global Vision Technologies Exhibiting at Michigan Federation Senior Management Conference

September 15, 2015

Global Vision Technologies, Inc., (GVT) an I.T. consulting firm in St. Louis, MO, is set to present their newest software systems at the upcoming Michigan Federation for Children and Families Senior Management Conference on 9/16 and 9/17.

Visions SYNC helps navigate common data entry traps and streamlines the data entry process for social workers, saving agencies time and money. [FAMCare 5](#) is a simplified version of GVT's already popular software package, FAMCare [rapid case management software](#). FAMCare 5 was developed to help smaller agencies get started with electronic case management. Visions SYNC and FAMCare 5 solve common data entry problems that plague most agencies who are mandated to use state sponsored software and who are not in control of their own data.

Global Vision Technologies' George Ritacco says, "There is so much redundancy that plague these larger, state and legacy systems. In addition, so many smaller agencies don't use a system of their own and have no control over their data. Taking a closer look at the problem – we were able to come up with a fairly simple and yet powerful solution. The combination of Visions SYNC with FAMCare 5 accomplishes two important things. On one hand, it gives an opportunity for case workers to spend more quality time with their most vulnerable families who really need their help, instead of being tied to their computers all day long. On the other hand, it gives agency directors the ability to maintain full control of their data, while complying with state mandates. We're very excited about our newest offer and have already received some very positive reviews."

The mission of the Michigan Federation for Children and Families is to unite private, nonprofit human service providers, advocates, customers, individuals and funders to influence public policy in support of children, families and individuals' reaching their full potential; identify, develop and implement efficient and effective services to Michigan's most vulnerable children and families; and support and enhance the ability of Michigan's private, nonprofit agencies to provide human services.

Anyone who is attending the conference and is interested in learning more should visit GVT at the FAMCare exhibit booth.
